

Rambam Maimonides Medical Journal

Last Updated June 2019

INSTRUCTIONS FOR AUTHORS

General Policies

SPECIAL NOTE: Manuscripts that do NOT comply with these instructions may be returned to the author for corrections before undergoing review.

To submit a manuscript, please log in to our [Author Center](#).

For any problems with your submission please contact the [Journal Administrator](#).

Rambam Maimonides Medical Journal (Rambam Maimonides Med J) is an Open Access peer-reviewed international scientific online general medical journal published four times per year. *The Journal* publishes original articles, reviews, perspectives, Rambam Grand Rounds and symposia as well as special essays concerning ethical and societal aspects of medicine. All manuscripts undergo peer review and professional copy editing.

No fees are charged for submission or publication of a manuscript. This journal is solely supported through donations. All donations are gratefully acknowledged.

The Journal is an EBSCO and CrossRef member with articles indexed by **PubMed, Thomson Reuters Emerging Sources Citation Index**, Google Scholar, and the Directory of Open Access Journals.

Please see our [Publication Ethics and Malpractice Statement](#) for more information.

Copyright

All articles published in *Rambam Maimonides Medical Journal* are open access and distributed under the [Creative Commons Attribution License](#) except where otherwise [noted](#). **The journal solicits no subscription fees nor processing costs from the authors.**

Open Access authors retain the copyrights of their papers, but authors allow anyone to download, reuse, reprint, modify, distribute, and/or copy articles in *Rambam Maimonides Medical Journal*, so long as the original authors and source are properly cited.

No permission is required from the authors or the publishers, except for material obtained from previously copyrighted publications that must remain under the original copyright restrictions and obtain the copyright owner's permission.

Originality and Plagiarism

The editorial policy of the Journal is guided by the high standards of scientific quality and integrity, responsibility and human compassion that constitute the Maimonides's (Rambam's) scholarly and ethical heritage. The Journal focuses on clinically relevant biomedical research and issues central to the provision of optimal health care to patients, disease prevention and public health.

---------------------------------------	--	---	---	--

Manuscripts are accepted for review with the stipulation that they are submitted solely to *Rambam Maimonides Medical Journal*. **The Journal will not consider for review manuscripts that have been published elsewhere**, even if in another language, in another Open Access publication, or manuscripts that are being considered by another publication, or are in press. **All submissions are checked for plagiarism via Crossref Similarity Check, powered by iThenticate—the industry standard for originality verification.**

Authorship and Contributorship

RMMJ defines an author or co-author of a manuscript as someone who fulfills all four of the following criteria:

The author or co-author has:

1. Made substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work; AND
2. Drafted or revised the work in a critical manner for important intellectual content; AND
3. Given approval for the final version of the manuscript for publication; AND
4. Agreed to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

If a potential co-author does NOT meet ALL of the above criteria, the corresponding author should list this persona as a contributor, specifying their contribution, and list them in the acknowledgements.

As a condition of authorship, all authors must have seen and approved the submission of the manuscript and be willing to take responsibility for the entire manuscript. The principal/corresponding author will be required to submit a Covering Letter along with the manuscript, on behalf of all the co-authors (if any). The author(s) will confirm that the manuscript (or any part of it) has not been published previously or is not under consideration for publication elsewhere. Furthermore, any illustration, structure or table that has been published elsewhere must be reported, and copyright permission for reproduction must be obtained.

Ethical Oversight

Research manuscripts should include a statement that approval for human research was received from the appropriate ethics review board, including confirmation of informed consent was obtained from patients or subjects (parents or guardians where appropriate) involved in the research.

Conflict of Interest

Authors should disclose on the title page of the manuscript any potential, perceived, or real conflict of interest, especially any financial arrangement (e.g., grants received, advisory board memberships, share holdings) with a company whose product is discussed in the manuscript.

Recommended Reviewers

The review process can take anywhere from one to three months, due to the difficulty in finding an expert willing to spend the time needed to review a manuscript. Hence, your knowledge of other experts in the field is essential. All manuscript submissions require your provision of the names, affiliations, and e-mails of at least three experts who would be qualified to evaluate your paper. The Journal makes every effort to expedite this process by seeking their own additional reviewers.

You will be notified as soon as we receive a response from the reviewers. At that time your paper may be accepted, rejected, or a revision (substantial or minor) may be requested.

Manuscript Categories

Rambam Maimonides Medical Journal will publish the following types of papers:

Original Articles

Original articles are the Journal's primary mode of scientific communication. Peer review of original articles will be handled by the most appropriate editor. Original Articles should not exceed 5,000 words of body text and are limited to 75 references.

Review Articles

All review articles, even if invited, are peer reviewed. Reviews should not exceed 8,000 words of body text, and are limited to 150 references.

Research Letters

Case reports and clinical observations will be considered, but published as Research Letters. All research letters are peer-reviewed. Research letters should not exceed 1,500 words, and are limited to 1 table, 1 figure, and 10 references. No abstract or key words are required, and text should be formatted in one continuous section.

Letters to the Editor

Letters to the editor pertaining to papers published in *The Journal* within the past year or to related topics should not exceed 1,200 words and are limited to 10 references. Provide a unique title for the Letter on the title page with complete contact information for the author(s). Double-space the text of the letter. References, including reference to the pertinent article(s) in the Journal, should conform to the reference style for manuscripts. Letters are not subject to external peer-review.

Submission of Manuscripts

Manuscripts should be submitted online via the *Rambam Maimonides Medical Journal* online **Author Center**. New users should first create an account. After logging on, submissions should be made by clicking **Submit a New Manuscript**. The submission website has been designed to allow uploading your manuscript, text, and figure files in JPEG, GIF, PPT, TIFF, RTF, DOC and DOCX formats. The server will generate a PDF file to be used for review by the Editorial Board and external reviewers.

Preparing Manuscripts

- Manuscripts must conform to the "[Uniform Requirements for Manuscripts Submitted to Biomedical Journals](#)."
- Text should be supplied in a format compatible with Microsoft (MS) Word for Windows (PC). Charts and tables are considered textual and should also be supplied in a format compatible with MS Word.
- Manuscripts must be typed in 12pt font, double spaced with margins of 2.5 cm, including title page, abstract, text, acknowledgement, references, table(s), and figure legends, with no content in the headers or footers.
- All figures (illustrations, diagrams, photographs) should be supplied in JPEG, JPG, GIF, TIFF, PPT, PPTX, DOC and DOCX format. Please provide us with the SOURCE file for your figures so we can edit them, if necessary.
- Assemble the manuscript in this order: Title Page, Abstract, Text, Acknowledgments, References, Tables and Figure Legends.
- Be sure to include the FULL names of all authors, their degrees, and affiliations.

Cover Letter

A cover letter must accompany all submissions and provide the following information:

- A statement that all authors have read and agreed to the terms of the [Creative Commons Attribution License](#) (the full legal text of the license is available [here](#)), and the corresponding author is able to sign it on behalf of all the authors;
- A statement that the work is not and will not be submitted to any other journal while under consideration by *Rambam Maimonides Medical Journal*;
- Disclosure of any prior publications or submissions with any overlapping information; a copy of the work(s) must be provided; or a statement that there are no prior publications or submissions with any overlapping information;
- A statement of any potential conflict of interest, real or perceived, and of the role of the study sponsor, if any; this must also appear on the title page;
- A statement that each author listed on the manuscript has seen and approved the submission of this version of the manuscript and takes full responsibility for the manuscript.
- A statement advising whether or not content (tables, figures or text) has previously appeared in *any* type of publication, and a commitment to obtain the necessary permission if the paper is accepted for publication.

Title Page

The first page of the manuscript should contain the following information:

- The title of the paper, precise and brief (maximum of 130 characters).
- A short version of the article title (maximum of 50 characters).
- The full names and highest academic degree (even if only a BSc or Diploma) of ALL authors, department, and institutional affiliations.
- Name, address, telephone, fax, and email address of corresponding author.
- Potential conflict of interest.
- List of abbreviations.

Abstract with Key Words

Abstracts (maximum 250 words) are required for original articles and review articles. The abstract of original articles should be structured and divided into Objective, Methods, Results, and Conclusions. Structured abstracts *are not required* for Review Articles (maximum abstract length 250 words).

Three to six key words should be provided for indexing purposes. Use [Medical Subject Headings \(MeSH\)](#) terms as a guide.

Text

Typical main headings include Introduction, Methods, Results, and Discussion.

Abbreviations

Please keep abbreviations to a minimum. Complex terms used frequently in the manuscript may be abbreviated. Abbreviations are placed in parentheses at first use in the abstract and again at first use in the text. Authors should provide a list of abbreviations on the title page.

Laboratory Values

Laboratory values should be described in metric mass units. The International System of Units (SI units) can be provided in parentheses immediately after metric units.

Drug Nomenclature

Trade names of drugs and other products must not appear in the article title. The trade name may appear once in the abstract and once in the introduction or methods section; all other mention of the product must be in the form of the generic name.

Acknowledgments

On a separate page, preceding the References, contributions made by colleagues who are not authors of the paper should be acknowledged. This page should also include acknowledgments of published material reproduced with permission, as well as any related grant support received.

References

- References must be double-spaced and numbered sequentially as they appear in the text.
- References first cited in a table or figure legend should be numbered so that they will be in sequence with references cited in the text at the point where the table or the figure is first mentioned.
- Citations are to be inserted in superscripted Arabic numerals, not in parentheses.
- Superscripted references should be placed after the punctuation of sentences (after a period, comma, etc.)
- All references must be completely typed out at the end of the article on a new page. **Please do not use the footnote or endnote functions in your word processing program.**
- Abbreviations of journal titles conform to those used in the National Library of Medicine's *Index Medicus*.
- The style and punctuation of references follow the format illustrated by the following examples (if 6 or fewer authors or editors, list all; if 7 or more, list first 3 and add "et al"):

Journal articles

1. Ciechanover A, Heller H, Elias S, Haas AL, Hershko A. ATP-dependent conjugation of reticulocyte proteins with the polypeptide required for protein degradation. *Proc Natl Acad Sci USA* 1980;77:1365-8.
2. Adams SM, Bosch E, Balaesque PL, et al. The genetic legacy of religious diversity and intolerance: paternal lineages of Christians, Jews, and Muslims in the Iberian Peninsula. *Am J Hum Genet* 2008;83:725-36.

Books

3. Jones KL. *Smith's Recognizable Patterns of Human Malformation*. 5th ed. Philadelphia, Pa: WB Saunders Company; 1997

Chapter in a Book

4. Bergman JM, Skorecki KL. Chronic Kidney Disease. In: Fauci AS, Braunwald E, Kasper DL, et al. eds. *Harrison's Principles of Internal Medicine*. 17th ed. New York, NY: McGraw-Hill; 2008:1761-72.

Web sites

5. International Committee of Medical Journal Editors. Uniform requirements for manuscripts submitted to biomedical journals. Updated October 2008. Available at: <http://www.icmje.org>. (accessed February 11, 2009).

Tables

- Tables should be double-spaced on a separate page within the main document file following the References page(s). Please try not to submit the tables in a separate file.
- Each table should include a title/caption, and be sequentially numbered with Arabic numerals in the order of their citation in the body of the text.
- Tables should have column headings. Tables should be created using the Table function in Microsoft Word processing software. Excel tables will not load properly. **Do not use tabs or spaces to create columns.**
- All abbreviations used in the table should be explained in a footnote. Table footnotes should be placed on the same page as the table, immediately following it. The special symbols to be used for tables are as follows: *, †, ‡, §, ¶, #, ** (repeated), †† (repeated), etc.
- If any data therein have been previously published, a credit should be given to the original source. If the Table is completely obtained from previously copyrighted publications, permission from the copyright owner should be obtained, the source of the copyrighted material should be fully acknowledged and its copyright restrictions mentioned (see "Additional Copyright Information," below).

Figure Legends

- Each illustration must be provided with a legend.
- List all figures sequentially, as they appear in the text, with Arabic numerals.
- ALL symbols, signs, or letters used to identify parts of a photograph, or other illustration must be explained.
- ALL abbreviations must be spelled out.
- Legends should be double-spaced on a separate page within the main document file following the Table page(s).
- If an illustration has been previously published, the legend must give full credit to the original source (full citation), and a statement that permission has been granted and by whom should appear in the figure legend (see "Copyright").

Figures

- A reasonable number of black-and-white and color illustrations are acceptable.
- Figure legends must be separate from the figures (see "Figure Legends" above).
- Each figure must be submitted online in a separate file (not embedded in the manuscript document) when uploaded into manuscript submission system.
- The author should notify *Rambam Maimonides Med J* if the submitted material has been published elsewhere. **It is then the responsibility of the author** to obtain authorization to republish the submitted material in *Rambam Maimonides Med J*.
- All illustrations must be clear and legible. Patterns or shadings must be distinguishable from each other and dark enough for reproduction. Lines, symbols, and letters must be smooth and complete. Illustrations may be original drawings in black ink with typographic lettering; typewritten or freehand lettering is unacceptable.
- Acceptable formats for pictures, photos, and figures are JPEG, JPG, GIF, TIFF, PPT, PPTX, DOC and DOCX.
- **Please submit the original artwork so that the figures can be edited, if necessary.**

Supplementary Materials

Supplementary material is an online appendix provided by the authors to give readers additional information about their work. This appendix should contain materials that *substantially* enhance the main article only. Supplemental materials are used to give readers access to data that cannot be represented in the article due to page limitations. An article that includes supplemental material is meaningful without the extra data, but its value to the reader is enhanced with the addition of the supplemental material. Supplementary material is reviewed with the article, and is expected to be of the same high quality as any *Rambam Maimonides Med J* article, since the supplemental material is an integral part of the article.

Supplementary material should be uploaded in a separate file and marked as "Additional Material for Review."

Additional Copyright Information

Rambam Maimonides Medical Journal requires all authors to agree to its open access [Creative Commons Attribution License](#). This license permits unrestricted use, distribution, and reproduction of the article in any medium (except where otherwise [noted](#)), provided the original work is properly cited.

PLEASE NOTE: Some articles (especially Reviews) may contain figures, tables or text taken from other publications that have appeared in copyrighted material. The *Journal* will publish these materials only after receiving written permission for their use from the copyright owner, along with complete information as to source. The copyright holder should be informed that the copyrighted material will be published under a copyright license in a Creative Commons licensed article except for parts that remain under the original copyright restrictions. Thus, any copyrighted material will be duly defined as such and its source will be fully acknowledged.

Please do not submit any figures or tables that have been previously copyrighted, unless you have express written permission from the copyright holder to publish such material in *Rambam Maimonides Medical Journal*.

For any questions regarding your submission please contact the [Journal Administrator](#).
